The Vehicle Trading Portal is a marketplace for people who are interested in buying and selling their used cars. This portal bridges the gap between a buyer and a seller thus eliminating the need of a third-party agency/dealer and their hefty commission. People can post an ad or look up for used cars without shelling out a penny. Users can create an account free of cost and select the role of the buyer or seller. The forte of this portal is its simplistic yet appealing GUI. Focus is kept on an amiable interface that a naïve user can also navigate with ease. The main goal of the project is to give information about the seller and buyer who wants to sell their car and who want to buy a car.
